

Diamond Dream Getaway II

What a great way to usher in the Holiday Season...

Join STEMTech's Executives and top Field Leaders for the Vacation of a Lifetime aboard the Royal Caribbean Line's largest, most luxurious ship, for an eight-day cruise of the beautiful Caribbean. We'll be enjoying stops at magnificent tropical ports-of-call, including a private island, where relaxation and fun are your only "to-do list" items!

It's easy to qualify!

Contest Period: January 1 – August 31, 2009

Requirements to Qualify:

- Achieve and maintain fully qualified Diamond Director level for two months by August 31. (Distributors qualifying for August may meet the two-month requirement with the Extension Month of September.)

Levels of Qualification

CORAL DECK: 2 Cruise Tickets (Interior Stateroom) Pay only \$1000.

- Maintain 10 new Business Builders* with autoship orders for 2 consecutive months.
- Each new Business Builder must have 2 new Distributors on autoship for 2 consecutive months (during Contest Period)
- Have 3 new Legs that reach Director**

LIDO DECK: 2 Cruise Tickets (Interior Stateroom) Pay only \$500

- Maintain 10 new Business Builders* with autoship orders for 2 consecutive months.

***Business Builder:** A Distributor who enrolls with the FastStart Pack and is on AutoShip for two consecutive months, or enrolls with a ProRetailer's Pack, Senior Manager Pack or Director Leadership Pack and is on AutoShip with two customers, two Distributors (or a combination of both), ordering 2 bottles of StemEnhance®, StemFLO®, StemSPORT™ (or a combination) for 2 consecutive months.

**** Director Legs** must have 10 Distributors active for 2 months during the Contest Period

***** Airfare** is non-transferable and can be used only to fly roundtrip to Orlando, FL, for this trip in December, 2009. It is reimbursed with presentation of a receipt. Go to teamstemtech.com for complete Contest Rules and Qualification Criteria.

- Each new Business Builder must have 2 new Distributors on autoship for 2 consecutive months (during Contest Period)
- Have 4 new Legs that reach Director**

SKY DECK: 2 FREE Cruise Tickets (Ocean View)

- Maintain 10 new Business Builders* with autoship orders for 2 consecutive months.
- Each new Business Builder must have 2 new Distributors on autoship for 2 consecutive months (during Contest Period)
- Have 5 new Legs that reach Director**

CAPTAIN'S DECK: 2 FREE Cruise Tickets (Ocean View), plus up to \$800 Airfare***

- Maintain 10 new Business Builders* with autoship orders for 2 consecutive months.
- Each new Business Builder must have 2 new Distributors on autoship for 2 consecutive months (during Contest Period)
- Have 6 new Legs that reach Director**

GO for the GUSTO!
STEMTech's Director Leadership Conference
October 16-18, 2009
(with Opportunity Meeting Thursday evening, Oct. 15)

Bloomington Marriott • Bloomington, Minnesota

STEMTech Directors (and above) are invited to register to attend this weekend of intense training, challenging interactivity, and FUN, and it's all right near the hub of STEMTech's largest Distributor group (St. Cloud, MN). Join Ray, Christian, George and Dr. Donna, Heather, Bryan, and our top Field Leaders for a weekend that will shoot your business into the stratosphere! Centrally located for both US and Canadian Distributors, this DLC is within driving distance for many.

Make it a Road Trip with your Team!

Driving Distances to Bloomington, MN:

| | | |
|---------------|------------|--------------------------|
| Chicago | 416 miles | (6 hrs.) |
| Winnipeg | 468 miles | (7 hrs.) |
| Memphis | 863 miles | (12 ^{1/2} hrs.) |
| Toronto | 943 miles | (14 hrs.) |
| Denver | 947 miles | (14 hrs.) |
| Dallas | 949 miles | (14 hrs.) |
| New York City | 1215 miles | (17 ^{1/2} hrs.) |
| Spokane | 1391 miles | (20 hrs.) |

Don't want to drive? Flights are cheaper than they have been in a long time. Check out your favorite airline!

Two added bonuses...

- Participants in this DLC will receive a **CERTIFICATION** to conduct **Super Saturdays!**
- **THE MALL OF AMERICA, the largest Mall anywhere, is RIGHT ACROSS THE STREET!** Perfect for a little bit of early Holiday shopping...

Register today at teamstemtech.com.
SPACE IS VERY LIMITED. Don't be left out!

David Ortiz
Puerto Rico

A poet, actor, radio host and public speaker, David Ortiz is a busy man who is used to being in the public eye. But his own eyes had been giving him trouble for more than two years when, one day, Mariano Ramirez met him on the street and pointed out that he did not look too well. "I would like to send you some information about something new that can provide excellent results for your health," he told David. After David read the StemEnhance® materials, he ordered a bottle immediately; and when he noticed that the trouble with his eyes seemed to diminish after only a few days, he signed on as a STEMTech distributor, because, he says, "I want to help others feel really healthy, like me."

With no particular "target group" in mind, David says, "I speak to everyone everywhere, taking note of anyone I see who needs help." While his primary focus is on sharing the gift of good health with others, David is also pleased to be part of "a well-structured company that has business benefits" for people like him who want to develop an income. He is grateful for STEMTech's "excellent website and other tools," and for the help of his upline, Felix Pastoriza, who has been very willing to talk to new prospects, and to support and teach David as he builds an organization. Working the business part-time, David says, "I give the business all the time I can, attracting new distributors who can join me to achieve excellent health and business success."

Jeannie & Ray Plopper
Washington

By November, 2008, it had been seventeen years that Jeannie Plopper had endured unrelenting discomfort with her back that kept her from standing or sitting comfortably and that interrupted her sleep. Her husband Ray had recently been "downsized" from a job in the pharmaceutical industry. So the timing was right when their old friends Verne Eaton and Dennis Kluver talked to them about StemEnhance and the STEMTech business opportunity. "We were immediately interested," Ray says, "because of the personal character of Verne and Denny and the solid science behind the product."

When Jeannie started feeling dramatically different within weeks, the Ploppers wanted to share the news with everyone. "The

highest number of people we run into have sub-optimal health or sub-optimal finances... or both," Ray explains. "STEMTech's products and opportunity are just right for them." These days Ray and Jeannie are excited about the StemSPORT™ concept. "We have enrolled a ranked racquetball player, and are approaching athletes with this great combo-product," Ray says.

At Super Saturday, Ray and Jeannie especially enjoyed Dr. Donna's explanation of how the products work and George's business building pointers. "What a valuable training that was!" Jeannie says. The couple took eight people to Christian's book-signing earlier this year, with excellent results: "Christian is so eloquent, knowledgeable and sincere," Ray says. "Five of our guests signed up right away!"

Ever the scientist, Ray sums up: "Life is in the blood. And now, with StemEnhance and StemFLO®, the blood carries not only oxygen but also 25% more of the engines of renewal... to every part of our bodies."

Harry Wu
California

A real estate agent and investor for over sixteen years, Harry was never attracted to network marketing until he heard from friends about their benefits with StemEnhance in 2007.

"My wife Rachel said that if a company has such a tight product focus, it must be really top-notch," Harry remembers, so he enrolled and began building a business. After they had lived in the United States for twenty-five years, Harry and Rachel took their young sons and relocated half a world away to join STEMTech's global expansion and build a business with StemEnhance in Asia. "I have worked together with a close friend who is a physician in Malaysia," Harry says. "AFA Extract [StemEnhance] has shown tremendous positive results for so many of his patients."

Harry says that he and Rachel realized quickly that they can help a lot of people stay healthy with StemEnhance and - at the same time - build a huge global business. Harry makes good use of the training he has received at STEMTech Conventions and, he says "I watch STEMTech training videos to help me develop a simple and duplicable system for business growth." He is committed to providing local training for his distributors and to supporting them as they build.

As STEMTech continues to open countries in Asia, Harry and Rachel are prepared to expand their organization. He says, "We want to share the news with everyone: StemEnhance is a technological breakthrough, a scientifically proven, clinically tested, patented, all-natural stem cell enhancer with NO competition world-wide. Everyone must know about it!"

WHAT A CONVENTION!

Our Third Annual Convention was one for the history books, as we unveiled more exciting things than ever before! The event was chock-full of “What if” announcements, special guest speakers, intense training workshops conducted by Field Leaders and worldwide corporate executives, and recognition for everyone from our Medallion Winners to our Top States and Provinces globally to our contest winners and our top field performers.

A special congratulations to the Spirit of Service Award winners from the US and Canada: Denny & Merlie Kliver and Lena & Tony Schultz. Both of these “super-couples” are truly STEMTEch leaders and great examples to others.

Our international expansion continues...as we announced our Plans for 2009. We will be moving from Pre-Launch mode to Launch in Mexico, South Africa and Taiwan. We will also be Pre-Launching in no less than SEVEN new countries: Colombia, Germany, Ivory Coast, Spain, the Philippines, Australia and New Zealand!

Last but certainly not least, we introduced event discounts for all those who help us to help the less fortunate, through the newly activated AutoDonate Program for the STEMTEch Global Foundation. We thank all our Founding Benefactors who are taking a leadership role in giving back to the world community in need.

As you look through the pages of this *HealthSpan*, you will see how our expanded product line, the FastStart Free-For-Fall promotion, an enhanced Business Development Training, the STEMTEch University program and exciting new marketing tools will help you build for success!

Here's to your continuing wellness and prosperity,

Ray C. Carter, Jr.
President & CEO

terborg media group

NEW PRODUCT AND THE MEDIA... WHAT A COMBO!

The enthusiastic crowd who joined us at the Anaheim Marriott got the message: 2009 will be a pivotal year for STEMTEch! With the introduction of our new product, StemSPORT™, which is a blend of StemEnhance® and StemFLO® in a citrus-flavored chewable tablet, we have added even greater convenience to the support of the body's renewal system. We know that this convenience will be embraced by athletes, active people, and anyone who is “on the go.” To help you market this new product, we have developed StemSPORT apparel items and collateral materials (See page 13), which were a big “hit” at our Convention and which are now available to you in your Back Office.

Our aggressive media campaign this year will follow on the heels of our company's feature in *Your Business at Home* Magazine (2007) and the publication of my booklet *The Stem Cell Theory of Renewal* (2008), which were both well received publications. This year we have distributed press releases that have been picked up by hundreds of media outlets; and I have made a number of radio appearances, both here and abroad, to talk about stem cell science and StemEnhance. Within a short time, a full-length book on stem cell science will be published. We expect that it will be very popular in the media and have far-reaching consequences for us as The Stem Cell Nutrition Company™. As the author, it will now be easier for me to reach the media and talk about stem cells. This “media blitz” has already begun, actually: In Colombia, for example, I made eight TV appearances in the days that followed the announcement by President Obama of his stem cell policy. I am currently pursuing plans to tap into the media here in the United States and in Canada once the book is published.

We are pleased to be able to bring you unique products, like StemSPORT chewable tablets, and to support your business growth with media spots that will educate the public about the promise of adult stem cells. Implicit in every media appearance will be the fact that there is only one company with a patent on a stem cell enhancer... STEMTEch! Just think what this media blitz will do for your business growth!

To a pivotal 2009!

Christian Drapeau
Chief Science Officer

Spirit of Service Award

Dennis & Merlie Kluver,
Triple Diamond Directors
Washington

Anyone who knows Denny and Merlie Kluver will tell you that "Service" is and has always been their "middle name." While the Kluvers themselves do not consider their dedication to serving others to be anything special, everyone else knows that the Kluvers are one extraordinary couple whose service has literally changed the lives of thousands of people.

Whether it is their dogged pursuit of success for members of their downline, or their welcoming and nurturing embrace for crossline members of the STEMTech family, Denny and Merlie are always there, ready to do whatever it takes to help anyone who calls on them. Through an extensive email system, hundreds of phone calls, regularly scheduled meetings open to all, and their participation in regional and corporate events, the Kluvers keep in

touch with everyone... educating, training, motivating and supporting STEMTech distributors here and globally.

As busy as they are with their service to the STEMTech family, you would think that business-related service is plenty for any one couple. But service to their STEMTech family is only the tip of the Service Iceberg for the Kluvers! For many years Denny and Merlie have worked with a number of local charities, helping to improve the lives of people who are disabled or facing personal difficulties. Often they have taken people into their home while they recover from their challenges. The Kluvers are very active in their church and in missionary programs, and they happily sponsor four native children in Uganda, where they once lived and taught. A Gideon for nearly thirty years, Denny has traveled far and wide, providing Holy Bibles to people living in remote villages. "Our STEMTech business income has provided the funds for these trips," Denny says.

As she and Denny made their way to the stage to accept the Spirit of Service Award during the Recognition Banquet, Merlie was brought to tears. Humbled by a prolonged standing ovation, Denny said that he and Merlie are "blessed," and added, "Technically, we shouldn't even be standing here" - a reference to the dreadful physical and financial challenges they were facing before STEMTech. "We are so grateful to our scientist Christian and our leader Ray," Denny said, his voice breaking. "We're just so grateful," Merlie added. "With every challenge, we learn to help others."

We in the STEMTech family are grateful to the Kluvers for their untiring dedication to service. Merlie and Denny are role-models for us all, as we strive to be the best of humankind. We congratulate them on their Spirit of Service Award, which is richly deserved.

Verne & Jan Eaton

Washington

A veteran of 36 years in the insurance business, Verne says that he understands working for commissions and building residual income. "But," he points out, "with

STEMTech the commissions come quickly and easily, and there is a much greater residual return." The Eatons have used goal-setting protocols to envision themselves as Triple Diamonds since they first heard about StemEnhance® and the science of adult stem cells from Christian Drapeau himself at a meeting on Thanksgiving Eve, 2006. "Christian explained things so well, getting down to our level of understanding," Verne says, "that we went FastStart immediately." Verne was attracted because STEMTech marketed only one product line. "Years ago I was with another network marketing company that had hundreds of products," he says. "It was so confusing... and you had to talk people into buying our company's brand of the same products other companies marketed. STEMTech is unique and its product is unique!"

The Eatons are especially thankful for the training and support they have received from STEMTech and their upline. "Dennis Kluver has been so much help," Verne says, "and Bill Lohmeyer has greeted me on the phone from the beginning with 'Hi, Mr. Triple Diamond!' Their confidence in us is one thing that brought us to Triple Diamond." Verne and Jan have made it a point to get to many of STEMTech's national and regional events, too, noting, "Events are a great way to grow your business. STEMTech executives and field leaders do such a terrific job! You learn an awful lot, develop great friendships, and have easy access to the company's top leaders. STEMTech is a company unlike any other!"

Bev Lenz

Minnesota

Since Bev has travelled all over the United States for ten years, working alongside Triple Diamond Ralph Weber in his seminars for people with weight and addiction challenges, it was natural for her to become a STEMTech distributor. "Ralph and I share the same compassion," she explains. "We want to help people with their health." Ralph and Bev share the news about StemEnhance with attendees after the seminars, and Bev is always prepared to introduce the product to people she meets. "I always have product and brochures with me," she says, explaining that people can tell she cares about them, so they are willing to hear about our product, which, she notes, is "way ahead of its time!"

Bev appreciates STEMTech's wide array of tools. "With our tools, I can find the answer to whatever question someone asks," she says. Her current favorite tool for the "tough" questions? Bev says, "Christian's new booklet is the clincher! It is easy to understand and very complete."

While she is pleased to be a new Triple Diamond, Bev says, "The rank and the income are secondary for me. I prefer to count the number of people I have helped." As she focuses on helping many people, she applies the business acumen she displayed years ago as the first female in top management in a large manufacturing facility, in addition to the valuable training she has gained from STEMTech's Conventions and the DLC. "Nobody should miss these events," she says. These days Bev is especially excited about StemSPORT™. She says, "The StemSPORT concept is awesome! Together, StemEnhance and StemFLO® are a match made in heaven."

Chris Rucker

Abundant Life Ministries
Florida

A wellness educator since 1983 and author of three books on wellness, Chris says she has always believed in the power of nutritional supplements for good health. So when Suzanne Oravsky called to tell her about a plant-based product that could help her body release adult stem cells into the bloodstream, Chris remembers, "I said, 'WOW!' I signed up FastStart right away."

While she formerly applied her training in community health to a hospital setting, Chris now focuses her wellness education in the arena of the church, where she holds regular classes in nutrition, weight management and positive thinking. "StemEnhance and StemFLO are just perfect for my ministry," she says, explaining, "With the right diet, proper exercise, StemEnhance, StemFLO and a positive attitude, all kinds of good things happen!"

Currently working on her fourth book, this one about the seven lifestyle principles for good health, Chris is also looking toward her next STEMTech goal: President's Club. Chris is dedicated to urging the people in her organization to build their teams with Directors. So she was excited that five of her downline - including a brand-new Director - accompanied her to January's Director Leadership Conference. "The DLC is a real blessing," she says. "There is such encouragement, so much learning and growth, such empowerment... and the new STEMTech tools introduced there are fabulous!" Chris and her team have been using the Proven Four-Step System, and especially like the weekly corporate conference calls, the WealthBuilders Flash presentation, leads and *Your Business at Home* magazine. "And now we have the Everything STEMTech and STEMTech Biz DVDs!" she says. "2009 is our year to shine!"

Sharon Castoldi

*Ruby Director
Idaho & Arizona*

Sharon had heard about StemEnhance® in 2006, but it was not until Ellis Pottoff suggested that the product might help her beloved dog, who was in very poor health, that Sharon took a serious look at the product. “I bought the product for my dog,” Sharon says, “and when she was up and running around within two weeks, I knew this product was amazing. I enrolled FastStart and began taking StemEnhance every day.”

Experienced as a reiki healer, spiritual consultant and reader, Sharon has had a lifetime of helping others, so sharing StemEnhance soon became a natural part of her life, “a labor of love,” she calls it. When she winters in Arizona, she maintains a booth at the local weekend market. Shoppers are attracted by her gregarious personality, as well as her STEMTech sign and display of StemEnhance and brochures. Because many of those who stop by want to learn about how stem cells can help with their health, Sharon has begun holding hour-long bi-weekly seminars at the market, where shoppers hear powerful, in-person testimonials about StemEnhance. “People recognize the quality and sincerity of the people speaking,” Sharon says. “Many of them are very interested, and some sign up right away. I always follow up with everyone, because I know that StemEnhance just may be the best thing they’ve ever done for their health.”

Just back from “the fabulous Third Convention,” Sharon points out that STEMTech is a very different network marketing company. “I am impressed by the company’s charitable interests, helping people here at home and around the world” she says. And the STEMTech spirit of caring and support can be seen in field leaders like Dennis Kluver, too: “Dennis is a godsend to new and veteran distributors alike. He’s like a walking encyclopedia about STEMTech,” Sharon says. “I always know that he can answer any question for me, my distributors or our prospects.”

Marcey Hamm

*Inward Harmony
Double Diamond Director
Texas*

Ever since she “died” in a terrible car accident in 1985, Marcey Hamm has been able to compose music that she and people all over the world believe has a powerful effect on their lives. A self-described “computer geek,” Marcey was a software developer for a music company that created technological wonders for concerts by top performers, including Mick Jagger, all the while composing the music that just seems to come to her while she is in a very relaxed state. She uses a computer to do the musical notation from memory. “People hear about my music by word of mouth,” she says.

In 2003, Marcey suffered a serious physical setback that effectively curtailed her composing and caused her to be bedridden for more than two years. Life had become awfully miserable for Marcey when, she says, “Linda Wright called to inquire about any new albums. When she heard about my condition, she suggested StemEnhance.” Since Marcey had been “trying everything” to help her body, she tried StemEnhance. When her leg was feeling great in a few days, Marcey says, “I kissed and hugged the bottle!” Since then, as her health improves every day, Marcey has shared StemEnhance right along with her music, pointing out, “StemEnhance’s ability to support the body’s release of stem cells is next to drinking water in importance for wellness,” and adds, “I’m not much of a network marketer, but when I see what StemEnhance is doing for me, I can’t help but share it!”

Now back at recording her music and completing both her own recording studio and a book, Marcey has added StemFLO® to her daily regimen. “StemFLO,” she says, “lets my stem cells work more effectively, and my body rebounds so much more quickly. As I get back into exercising and my body’s strength returns, both StemEnhance and StemFLO are essential parts of my healthy diet. I am getting my life back!”

Craig Pixton

*Ruby Director
Starburst Global Technologies
Utah*

Craig says that his STEMTECH story is a little unique. Some time ago, a friend asked Craig to research stem cells as a possible answer to a limiting physical issue he had had since childhood. In his internet search, Craig stumbled upon the STEMTech website and was intrigued about StemEnhance science, so he enrolled... learning that the company had a product for horses, too. Craig owns and loves horses, and his steed Eclipse (pictured) was struggling at the time from a hoof problem. Craig says, “He just lay down all day, because he couldn’t put any weight on his leg. I worried that he wouldn’t make it.” Once Craig gave StemEquine® to Eclipse, the horse began to improve. “By the end of the month,” Craig reports, “he was up and running around. I think StemEquine gave his life back.”

His StemEquine tale is only the beginning of Craig Pixton’s experience with STEMTech’s products. Craig himself had been a professional race horse trainer until a back injury ended his career. For twenty years, he says, “I toughed it out, but I couldn’t do much... couldn’t roughhouse with the kids or even ride horses. I went from being a very active person to ‘riding a desk.’ It was a depressing lifestyle change.” When he saw the dramatic change in Eclipse after StemEquine, Craig had hope that StemEnhance might help his own body... and he was right! Within several months, he says, “I was back riding horses and working out in the gym. By last December I was close to trim-weight and could rack-pull 500 pounds!” Now he enjoys working out with his adult children, noting, “We have a better relationship than we ever have had, thanks to StemEnhance.”

These days, when Craig sees someone who might benefit from StemEnhance, he asks their permission to “educate” them a bit about stem cells. Most people, he says, are willing to listen, because he tells them the truth: “This product has changed my life and those of people around the world. It can do the same for you!”

StemSPORT is the combination of StemEnhance and StemFLO for athletes and active bodies.

Introducing... StemSPORT Chewables Tablets

By Christian Drapeau, M.Sc

What is the StemSPORT concept? Soon after we launched STEMTEch in November 2005, a number of athletes began taking StemEnhance® with remarkable results. For example, Frank Condon established the World Record in the 1500 meters for men over 65. Pushpa Chandra broke the World Record in the 100 km marathon in Antarctica by more than 3 hours, and in April, 2009 she won the same marathon at the North Pole! Both of these world-class athletes recognized that StemEnhance and StemFLO® played an important role in their success and -- more importantly -- in their recovery. StemSPORT is the combination of StemEnhance and StemFLO for athletes and active bodies.

How does StemSPORT contribute to improving recovery after physical activity? Any kind of significant physical activity - playing tennis, shoveling snow, running -- leads to the damage of muscle

fibers. With muscle tissue, as with any other tissue, stem cells from the bone marrow are responsible for the repair process taking place after intense activity. Therefore, by increasing the number of stem cells in the blood with StemEnhance, more stem cells are available to migrate into the muscle and support the repair process. In addition, improving blood circulation with StemFLO will enhance the delivery of stem cells to the damaged muscle and will also contribute to clearing out lactic acid and other debris from muscle activity. The consequence is a more rapid recovery that allows an active person to enjoy working out and to return to more activity sooner.

When we created the concept of StemSPORT, it immediately came to mind that blending StemEnhance and StemFLO into one delivery system would be a convenient and effective way to support physical activities. We thought of a drink, or maybe a gel; however, after many prototypes it became clear that the best option was a chewable tablet that a person can take at any time before, during and after physical activity. But there was a challenge: Anyone who has tasted StemEnhance or StemFLO knows that turning these products into a tasty chewable tablet would not be easy. Nevertheless, after intense product development involving experts in natural flavoring, we reached a first milestone. Although the product will continue to evolve and get better, the current version is already a great achievement. Tapping into the existing bitterness of the two products, StemSPORT chewable tablets have been formulated with a citrus flavor (resembling Vitamin C chewables). Aside from its positive impact of flavor, the formula is further enhanced by the addition of D-ribose, which is well known to assist recovery after physical activity.

And a big advantage of taking StemEnhance and StemFLO in a chewable form is that the products are rapidly picked up by the bloodstream and readily available to the body so you benefit from the effects faster!

How to Take StemSPORT Chewables Tablets

By Donna Antarr, M.D.

Each StemSPORT™ chewable tablet is equal to one-half capsule of StemEnhance® and one-half capsule of StemFLO®, combined. We suggest that active people take 2-6 chewable tablets before exercise and 2-6 chewable tablets after exercise. Both your body size and the intensity of your activity will help determine whether your chewable serving should be two, three, four or more at a time.

Here is a general guideline for most people with two levels of activity:

- Low to moderate intensity - 2-3 StemSPORT chewables**
- Moderate to high intensity - 2-6 StemSPORT chewables**

It is always best to begin with the low end of the serving suggestion, and increase your serving as your body and activity level dictate.

The StemSPORT chewables formula includes D-Ribose, a five-carbon sugar that occurs naturally in all living cells and facilitates the

production of ATP. ATP is a major source of energy that is used by cells, including those in muscle tissue, for normal function, and it is especially helpful to muscles during high-intensity workouts. Scientific studies suggest that D-Ribose may help to improve recovery after intense physical activity.

StemSPORT chewable tablets are for athletes, "weekend warriors," active people, "couch potatoes" who want to get moving... for everybody!*

*StemSPORT Chewables contain soy. They do not contain gluten, dairy, preservatives or coloring. If you are taking anticoagulants or medications, if you are pregnant or nursing, or if you are being treated for a medical condition, please consult your physician before beginning to take StemSPORT Chewables. This product is not for pets.

Marketing with StemSPORT By Heather Livingston VP/Global Product Training & Sports Marketing

As you begin to build your business with StemSPORT, please refer to these articles I have written to help you:

- "Using the StemSPORT Brochure to Build Your Business" (HealthSpan, Winter 2008-2009: Volume 3, number 3)
- "Tips on Advertising" (HealthLink, January 2009: Volume 3, issue 5)
- "Sponsoring in the Athletic Arena" (HealthLink, February 2009: Volume 3, issue 6)

And watch for my two-part article, "Marketing StemSPORT™ to Athletes" appearing in the April and May issues of *HealthLink*. The valuable information, tips and ideas in these articles - and on our website, stemsport.com -- will help you build a successful business around StemSPORT, the Ultimate Fuel for Renewal!

Our Fourth Annual Convention is in July-August 2010 ... Make it part of your Plan of Action to BE THERE!

Time to Shine

Reflections on STEMTech's Third Annual Convention

If you were there, you know that it was a weekend like no other... If you missed STEMTech's Third Annual Convention, here's what some people had to say about the weekend...

What was your favorite part of the weekend's reveals?

Sharon Castoldi (Sapphire, Idaho): That's easy... STEMTech is sharing media-generated leads only with those of us who are at the Convention. That's a fabulous advantage for us!

Donal Johnson (Director, Texas): The media blitz the company is involved in, especially with the new StemSPORT concept and Christian's new book. This will make STEMTech a household name.

Suzanne McDrummond (Senior Director, Oklahoma): My favorite is the FastStart Free-for-All. When our new Business Builders bring in three or more Business Builders and become Directors in 90 days, STEMTech puts their \$299 FastStart charge back into their account!

Paula Conrad (Senior Director, Minnesota): StemSPORT Chewables! I wanted to dance Saturday night, but didn't feel up to it. I took some of the new Chewables, danced all evening in heels and woke up Sunday feeling great. What a product!

Dr. Mary Ozegovich (Director, New York): The new Distributors Training Distributors was fabulous. What a privilege... I met our top Leaders, I heard them share their wisdom in person. Excellent!

Stephen "Murf" Murphy (Sapphire, Minnesota): Hearing from Pushpa Chandra, Kevin Kouzmanoff and Frank Condon - world class athletes speaking for StemSPORT -- and Rev. Ben Kinchlow... I saw him on TV for years. These people are speaking for our products! Wow!

Overall, what are you taking away from this weekend?

Barbara LaFountain (Senior Director, California): It's the feeling that I've finally "arrived." I am a part of a large family where everybody helps each other. Meeting and bonding with people who had been just voices on conference calls... What an opportunity!

Mark & Erin Parsekian (Triple Diamonds, Massachusetts): A weekend of memories! For Liam, we're taking home the autographed and framed NBA All-Star Legends game shirt that we won in the Silent Auction. It was our privilege to support the STEMTech Global Foundation with our winning bid!

Merly Tenorio (Triple Diamond, Virginia): The inspiration! The Big Vision! I brought my five sisters - all nurses - so they could feel what I feel about this company. Now we are all on fire!

Victor Miller (Supervisor, New York): I've only been with STEMTech two months. After these two days, I don't feel alone... I feel like I belong. All my life I've been trying to "catch up." Now I'm on the beginning of a giant wave. This trip has been so worth it!

Sandra Meyer (Executive Director, Illinois): I am so fired up... I can't wait to go home and sign people up!

Ian Davies (Triple Diamond, Hawaii): Clarity... The complete certainty that we are going to make history in the world!

Congratulations to STEMTech's Top Achievers for 2008

Top Five Enrollers of Directors

And CONGRATULATIONS to the scores of Distributors who received their Medallions on stage!

Introducing... STEMTech University

On each level, the focus is on effective training and FUN

STEMTech launches a new concept in business development training with STEMTech University. With the slogan "We make learning fun!" STEMTech provides a multi-faceted learning program where every Distributor can participate in "course levels" that lead to a "graduation" unlike any other... The Diamond Dream GetAway!

Distributors accumulate course credit as they build their businesses using STEMTech tools and by attending and participating in company-sponsored regional and national events. It all begins with the purchase of the Business Development Training, and Distributors work their way up the STEMTech University levels, receiving "course credit" for each milestone attained.

On each level, the focus is on effective training and FUN... so get started today! Check teamstemtech.com for complete details. We want to see YOU at "graduation"... the next Diamond Dream GetAway aboard the *Freedom of the Seas!*

For STEMTech Distributors ONLY!
American Nutraceutical Association's

Build for Success

You asked for it...
STEMTech's NEW BUSINESS DEVELOPMENT TRAINING

It's all here... Everything you need for a successful start in business. When you order the new Business Development Training, here's what you get:

- The new **STEMTech Biz** DVD, with a professional **Product & Opportunity Presentation** and an Introduction to the Compensation Plan
- A new **Data CD**, with **Business Development Training** and business Documents
- The **QuickStart Guide**, which includes:
 - Get your business up and running in 48-hours
 - Overview of the **Proven 4-Step System™**
 - Build with NO rejection... What to say
 - Business Builders checklist
- **Proven 4-Step System Workbook**
- **Who do you know?** Memory jogger
- **Training Manual**, which includes:
 - Action Planning Session
 - Leverage & duplication, linear vs. residual income, three-way calls
 - Hotel & home meetings, approach market, working with leads
 - Personality styles, talking points, dream-building
- **Rewards and Recognition Summary**, including rank qualifications, special training opportunities, Car Bonus Program, and those fabulous TRIPS!

But probably the most popular part of the BDT Kit - if the wild applause from the Third Annual Convention audience is any indicator - is this:

A tabletop Flip-Chart for the STEMTech Business Presentation!

As a special feature, this flipchart is two-sided: As your prospects look at the professionally designed PowerPoint slide on their side, YOU have "What to Say" notes facing you. So you can make a professional presentation with confidence the first time and every time!

Order your Kit today!

Business Development Training

Item code #0500
US\$60.00

Special \$50 through May 31!

It's STEMTech's FastStart Free-for-All... and it's underway NOW!

Exciting stuff! Through March 2010, all new distributors who purchase a FastStart or Leadership Pack will receive a 2-for-1 voucher (\$259 value) to attend their first STEMTech Convention with their spouse or a guest. The \$299 FastStart Pack is now worth over \$700. Be sure to tell your prospects about it!

Special Promotion

For three months (April 1 to June 30, 2009), distributors enrolling as Business Builders with a FastStart Pack or Manager Pack will receive a \$299 credit to their account if they achieve the following within 90 days after enrollment:

- Personally enroll at least 3 Business Builders
- Achieve the Director level

With this FastStart Free-for-All, what you paid for your FastStart Pack is refunded to you as a credit! Your credit will be issued one month after you reach Director, and it can be used to purchase product and/or sales aids. The new Director (YOU) and your 3 Business Builders must be active on AutoShip continually up to the date of the credit. This is a fantastic incentive for your new Business Builders! Help them get to Director within 90 days, and they'll have a \$299 credit right in their account.

It's STEMTech's FastStart Free-for-All... and it's underway NOW!

STEMTech Around the World

Within a year, STEMTech will be open in FIFTEEN COUNTRIES... on every continent but Antarctica! Our Global VP's are hard at work planning Pre-Launches, Launches and Openings in SEVEN new countries this year. Here's what they had to say at the Third Annual Convention about their plans...

South Africa

by Errol Lester

On a continent where no two countries are identical, the challenges associated with opening for business are vastly different from one country to the next. Our first African presence -- in South Africa -- has developed nicely over the last two years. Our foundation has been laid and our systems are functioning smoothly, as was demonstrated in March, when we had our best sales month ever!

In preparation for the official Launch of South Africa on July 25, we have welcomed our new General Manager Luke Vryenhoek, whose interest in health and sports suits him perfectly for our company, in a nation with 35,000 soccer clubs... and which will host the World Cup soccer competition this year.

As Luke takes care of the day-to-day operation in Johannesburg, I will be traveling to three of the 53 nations on the African continent -- Ivory Coast, Nigeria and Kenya -- to set the stage for STEMTech's expansion into those countries. A tip: Now is the time to reach out to people in Ivory Coast, Nigeria and Kenya through Virtual Sign-Up. Build an organization now, so you are ready for momentum when we Pre-Launch!

Asia

by Jonathan Lim

The worldwide recession seems to have skipped over much of Asia, as economies in most Asian nations continue to expand. Because stem cell is a very popular "buzz word" throughout Asia, people in Taiwan and Malaysia flocked to hear Christian Drapeau speak about stem cell science and StemEnhance (AFA Extract in Malaysia). Medical professionals were especially impressed to hear from a respected scientist in this exciting field.

We congratulate our first two Triple Diamonds from Taiwan, Yu Hwa Lin and Ted Wang, who traveled to be present at our Third Annual Convention. With the help and support of Field Leaders like ChiTung Tsai and Vanessa Tu, the Taiwan operation has grown quickly. Recently accepted into the Direct Selling Association (DSA), STEMTech Taiwan is preparing for a "mini-DLC" on May 23-24 and our Grand Launch on September 26.

Leaders including Harry Wu have been responsible for the tremendous growth of STEMTech in Malaysia. We are pleased that Harry and his wife Rachel traveled to the Convention from Malaysia, as did our new General Manager for the Kuala Lumpur facility, multi-lingual Benjamin Yap (pictured with our VTI tour group, below). Both Benjamin and Henry will be involved in preparations for our Malaysian "mini-DLC" on July 25-26.

What's next in Asia? The Philippines! With the second-largest number of Virtual enrollments (next to Colombia), the Philippines is ready to welcome STEMTech this year. Next in line (for numbers of Virtual enrollments and STEMTech development) is Indonesia, the fourth largest population in the world. Since Christian spoke to large groups in both the Philippines and Indonesia recently, the people in both countries are begging for STEMTech to open there!

Europe

by Andy Goodwin

Virtual distributors in Europe have a benefit that their counterparts elsewhere in the world do not: A Virtual Distributor in any country of the European Union (EU) can buy STEMTech products wholesale! This benefit has been very popular with the many Virtual Distributors we have on the continent. Product is shipped out of our London warehouse.

For those of you in North America, I would like to point out that the strength of the Euro means that you can earn larger commissions from your sales on the European continent! To help you expand into the European market, we have set up a toll-free number that connects you directly to the United Kingdom weekly call each Monday at 12 noon Pacific time. Simply dial 1 866 942-8802, key in pin number 117939, and you're in! Without leaving your home, you can be plugged into our exciting European operation. We look forward to welcoming you on next week's call.

Over the next month, we will be holding preliminary meetings in Germany, Holland and Spain, with plans to Pre-Launch in these markets later in the year. These countries and Australia and New Zealand have been selected for our next openings, based on Virtual Enrollment numbers. So... Who do you know in Germany, Holland, Spain, Australia or New Zealand? Contact them NOW, so you and they are ready when we Pre-Launch!

Latin America

by Oscar Rosas

You are invited to join us for the Official Launch of STEMTech Mexico in beautiful Puerto Vallarta on June 20-21. We are very excited that our rapid growth and the development of our strong Field Leaders have prepared us for this special occasion. STEMTech Mexico General Manager Juan Carlos Saucedo has worked with our Field Leaders to develop "Multiply," our slogan for growth through duplication that means, in English, "multiply yourself." Our large group of Mexican Distributors at the Convention proudly wore their "Multiply" badges and enjoyed explaining their meaning to non-Mexican Convention attendees.

StemSPORT has come to Mexico, and has been very well received. Jamaican General Manager Gary Ingram has also

happily welcomed StemSPORT to his island, where there is a tremendous sports tradition.

In preparation for our Colombian Pre-Launch in Bogota on May 16-17, we have brought on board Monica Zamorano as General Manager. Monica (pictured here with Juan Carlos) will be working with the more than 800 Distributors who were Virtual Sign-Ups in only two months in this nation of friendly, passionate people who enjoy a stable economy.

Future plans for Latin American openings include Brazil (first quarter, 2010), and Trinidad & Tobago, Peru, Argentina, Costa Rica, Ecuador and Chile. You can help decide which of this last group will follow Brazil... Get busy on the internet, reach out to enroll Virtual Distributors, and you can help us select the next countries to Pre-Launch!

Canada

by Martin Dichupa, General Manager

The last six months have been especially busy at the Richmond headquarters, as we work hard to supply Distributors all across Canada with products and collateral materials in a most timely manner. Since January, our Distributors have been happy to add StemSPORT™ to the product line they can offer customers, and the new Distributor Kit has been a big hit with veteran and new Distributors alike. We are happy

to report that we now have a full inventory of StemSPORT apparel and sales and training aids ready for shipment.

We keep everyone up to date through our website www.stemtechbiz.ca and with the publication of *HealthSpan* Canada and Canadian *HealthLink*, where Distributors can learn about our exciting upcoming STEMTech events. Planned May and June are:

- May 28** Toronto, Ontario STEMTech Showcase (7 - 9 pm) Courtyard Marriott, 475 Yonge Street
- May 30** London, Ontario Showcase (10 am) Super Saturday (1 - 5 pm) Hilton Hotel, 300 King Street
- June 12** Montreal, Quebec* Stem Cell Science Lecture by Christian Drapeau
- June 13** Rouyn-Noranda, Quebec* Stem Cell Science Lecture by Christian Drapeau Agora des Arts, 170 rue Murdoch (2 pm)

* Montreal time and Quebec locations to be announced. Go to stemtechbiz.ca for latest updates.

Dorothy Adams

California & Arizona

A California “snowbird” who spends her winters in Yuma, AZ, Dorothy learned about StemEnhance® from friends, who suggested she contact Sharon Castoldi. Dorothy had been struggling after a fall that resulted in broken teeth and a slow-healing bone graft. When she contacted Sharon, the two women hit it off immediately, and Dorothy began taking StemEnhance. When she experienced good results within days, Dorothy enrolled as a distributor and began working with Sharon at her STEMTech booth at a weekend bazaar.

From the outset, Dorothy says, “Sharon’s colorful style and my organized, down-to-earth ways have worked well together.” Dorothy has assembled information packets that contain product brochures, reprints of articles by Christian and Dr. Donna and application forms. “A lot of what we do is education for people who stop by the booth,” Dorothy says. “So many people still don’t know how stem cells work to help renew our bodies.” Dorothy has found that the reprint of the *Cardiovascular Revascularization Journal* study and Christian’s new booklet are very powerful attractions, especially for medical professionals and the more educated shoppers. “People are buying these books, and they come back and sign up!”

Dorothy says there are three things she loves about STEMTech: “First, there are only five products, and they are all unique and backed by scientific research. Next, people always come back to tell me of their great results, so STEMTech products support retention. And finally, STEMTech is a company of integrity, with extraordinary, service-oriented leaders. It’s the company for me!”

John Caruso

New York

A real estate agent whose life has been a challenge recently, John says he was pretty much of a “hard sell” when his colleague Diane Corrado tried to interest him in StemEnhance and the STEMTech opportunity. “I had sworn off network marketing after 35 years of disappointments,” John says, “so I kept saying ‘no’ each time she contacted me.” But Diane persisted, ultimately convincing him that the patented, concentrated AFA in StemEnhance was far more economical than the expensive whole AFA he had been buying. “I got phenomenal results very quickly,” John says. Before

StemEnhance, he says, “I had no stamina. I was washed up after work. Now, I have mental clarity all day, there are no more naps at lunchtime and I still have energy after work!”

“This business is a godsend for me,” John says, feeling positive for the first time in years. “This is the product I’ve been waiting for all my life,” he explains, “and STEMTech’s compensation plan is fair and generous for all of us.” As he builds with support from his upline, Izzy Matos and Sal & Val Vaccaro, John says he feels confident about the future: “With STEMTech, I know I’ll be able to live comfortably, enjoying a great quality of life.” Each day he looks forward to helping others. “I want to contact as many people as possible, especially those who need StemEnhance and the opportunity the most,” he says. “So many people are suffering these days, as I was. I want to help them feel as good as I do!”

Dianne Christen

Minnesota

After a rambunctious first-grader knocked her down and injured her hip, teacher’s aide Dianne was in for a year of struggle, aggravated by genetically weak ligaments, loose joints and spinal

weakness. “I was so frustrated,” Dianne says, explaining that she always felt stressed. Luckily for Dianne, her sister Sharon Soyka was a STEMTech distributor already building a successful business by April, 2006, when she told Dianne that StemEnhance might help with her unhappy situation. “Within a couple of months,” Dianne says, “I no longer had to hold onto someone to stand up from a sitting position. And my hip felt just fine... after a year!” Dianne knew she had to join Sharon in telling everyone about STEMTech’s amazing product.

Since then, Dianne has built her business, taking advantage of every opportunity to learn from her sister and the many regional events, the Director Leadership Conference and three Conventions she has attended. With a background in healthcare, Dianne has been especially excited to plan and participate in local events where Christian speaks. “Christian always does such a fantastic job of explaining things in layman’s terms,” she says. “These meetings - and all the other STEMTech events - are great places to take new or prospective distributors. It’s wonderful to see their excitement, and their commitment is so strong afterward.”

Dianne says she loves the new DVDs introduced at January’s DLC. “*Everything STEMTech* includes Christian’s great explanation, like the one he gave here in St. Cloud, and Dr. Donna’s simple explanation of the benefits of StemFLO®,” she notes. “This DVD is just what I wished for!”
