Introducing a Patent-Pending Novel Formula to Optimize Stem Cell Circulation

by Christian Drapeau

SUMMER JOURNEY AND BEYOND

As we move into summer, we look forward with great anticipation to future growth. Over the past few months of spring time, we have planted seeds of new programs and activities, and have watched with pleasure as they begin to flourish into a network of support for STEMTech's worldwide expansion.

We know you will enjoy the pages of photographic memories from our Second Annual Convention (pp. 8-10). This fabulous weekend was a major success, full of exciting announcements, excellent training and three days of enjoyable socializing that people are still buzzing about. Since the Pre-Launches in Jamaica and Taiwan, all STEMTech distributors now have the opportunity to build globally in seven countries. What's more, the "virtual signup" program introduced at the Convention allows every STEMTech distributor to pre-register "market pending" distributors in any country around the world! The number of "market pending" distributors per country will be a criteria for our choice of future Pre-Launches; and you will have distributors ready to join your organization immediately upon their country's Pre-Launch.

Also supporting our expansion around the world is the new Global Edition of *The STEMTech Story* DVD, which allows you to communicate our *Story* in five languages. And EU RetailDirect opens the door to StemEnhance customers in the twenty-seven countries of the European Union.

Triggering thunderous applause at the Convention were the announcement that STEMTech is the featured company in the June issue of the prestigious *Your Business at Home* magazine, and Christian's introduction of StemFLO™, a new companion product to StemEnhance® that promotes circulatory health and provides antioxidant support for the body.

Enjoy your summer... It is a great time to socialize, talking face-to-face with people about how STEMTech can change their quality of life. It might just be the answer they have been looking for.

Here's to your growth and prosperity!

Ray C. Carter, Jr.
President & CEO

terborg media group

MILESTONES

This year STEMTech reached numerous milestones, but one that is dear to me is the creation of the STEMTech Global Foundation (STGF), announced at the Second Annual Convention in April. The STGF gives STEMTech family members a single place to make charitable contributions to the non-profit groups funded by the company.

When we created STEMTech HealthSciences, our desire was to create opportunities for health and financial freedom, so that such freedom could, in turn, be used to improve the world around us. We strongly believe that we make a living by what we get, but we make a life by what we give. Success is measured not by what we earn but by what we do for others. The mission of the STGF is primarily to improve the quality of life for children around the world, understanding that this mission oftentimes includes supporting mothers, families and the environment. To us, there is no greater feeling of achievement than the knowledge that our daily work is actively helping to improve the world. True elation comes from the realization that we participate in a cause greater than ourselves. So as we develop the STGF, we will offer you the opportunity to participate at whatever level you choose.

And there is more good news to share: You all know that when we started in 2005, the concept that bone marrow stem cells constitute the natural renewal system of the body was still in its infancy. Only three years later, this concept is almost universally accepted in stem cell research, the result of years of dedication by many scientific teams throughout the world, to whom we owe much gratitude. Their research and work have made our story possible. Yet it is STEMTech that has been one of the main forces bringing this information into mainstream healthcare and to the public. In recognition for my part in this work, I was recently awarded the title of Professor Emeritus of the National College of Anti-Aging Medicine of Mexico. This significant milestone recognizes the work we are all involved in, and it is a title that I humbly share with everyone who has played in role in STEMTech's success.

Thanks to all of you, and on to the next milestones!

Christian Drapeau
Chief Science Officer

terborg media group

Spirit of Service Award

Izzy and Lori Matos

When Christian called their names as recipients of STEMTech's second annual Spirit of Service Award, Triple Diamonds Izzy and Lori Matos were stunned. Brought to tears, Izzy says that moment was "probably one of the biggest moments for me with STEMTech... and I have been fortunate to have many memorable moments with this company." When he and Lori accepted the crystal award, Izzy was uncharacteristically at a loss for words for a few moments, as "the significance of this acknowledgement settled on me," he says.

Izzy spoke of "gratitude for the people out there, the wonderful people we have had the opportunity to work with." He pointed out that service is the highest calling that any of us can aspire to, and quoted Christian Drapeau: "We live and are gauged by our contributions to others." Izzy said that it is "incredibly fulfilling to come close to living by the standard of service established by Christian."

In reflecting on the Award following the Convention, Izzy remarked that STEMTech has been wholly responsible for bringing him to a point in his life where service to others is

even possible. "There was a time, not so long ago," he recalls, "when Lori and I were really up against it. We had very little and had to depend on family and friends for help. So we know how hard it is to struggle everyday just to feed your family."

These days, Lori and Izzy make service to others their Number One priority, and they have taught these values to their three children, Adam, Cassi and Ellyn. For example, each year the Matos family "adopts" families at the holidays, and the whole Matos family goes out shopping for food, clothing and special treats and toys to brighten the lives of less fortunate families. "Our kids have asked that we all forgo buying things for ourselves, so we can give more to our adopted families," Lori says, adding, "What better gift could children give their parents than to live lives of service to others?"

The STEMTech Spirit of Service Award occupies a place of honor in the Matos household. Izzy says, "Everyday it reminds us that no achievements in life are equal to those that come when we help others. And we are so grateful to STEMTech for giving us the opportunity to have the resources to serve others."

CHAIRMAN'S CLUB

Teresa Curtis
Las Vegas, Nevada

Reinvigorating her business after a few months, Teresa made President's Club by mid-2007, then continued working and building to achieve Chairman's Club by March, 2008.

Teresa's Tips for Approaches

Use one of the following, depending on the circumstances:

Say, "If you could find a way to..."

- Make as much money as you are worth...
- Create a new paradigm of health for yourself...
- Pay much less in taxes each year...
- Change whatever aspect of your life you want to change...
Would you want that information?"

Then wait for their answer, send them to your WealthBuilders site, walk them through the Proven Four-Step System, and that's it.

It works!

It may seem a little ironic that the first member of the Chairman's Club is a woman, but the irony is probably lost on Teresa Curtis. She has never allowed herself to be stalled by a "glass ceiling" or any other gender-based impediments to business success. From the outset, Teresa has treated her STEMTech distributorship as a business, pointing out, "I realize that to succeed, at least ten others have to become Directors and five have to become Triple Diamonds. I make money when they make money."

Teresa says that she prospects only for "entrepreneurs, because they already understand the concept of working for yourself and they are self-motivated," adding that all she needs to do is direct them to the WealthBuilders System and TeleCenter. She says, "These two systems together give you a complete system for filtering and processing prospects. I use them consistently, because they are the easiest and most profitable way to grow an organization."

On board with STEMTech since before the October 2005 Pre-Launch, Teresa made Triple Diamond quickly, then "coasted" while she took lots of vacations. Reinvigorating her business after a few months, Teresa made President's Club by mid-2007, then continued working and building to achieve Chairman's Club by March, 2008. During nearly three years since the original Pre-Launch, she has attended every corporate event STEMTech has held, amassing a great deal of valuable business building information that she shares with her downline and other STEMTech distributors. She says many people call her "teacher," and explains, "Many people come up to me at Conventions and events and thank me for helping them become successful. That is very rewarding to me."

These days, Teresa says, "I'm back in 'recruiting mode,' because I want to further expand my business -- and go to Cancun -- so I'm on the phone a lot, both nationally and internationally. But," she points out, "even in recruiting mode, STEMTech is a fulltime job with part-time hours. I love this company!"

Dr. Sean Devlin*Colorado*

As a physician working in a hospital emergency room, Sean Devlin has seen his share of patients facing serious physical challenges.

Also trained in the field of anti-aging medicine, he has been exposed, he says, to “a plethora of nutritional supplements filled with promises.” It was not until one of the nutritional-savvy VIP patients in his personal practice described some dramatic results with StemEnhance®, however, that Sean decided to take a look, thinking, “If it’s this good, let me try it out.”

A dedicated exerciser and weight-lifter, Sean knew his tolerance level for work-outs. He was genuinely surprised, therefore, when his tolerance increased by twenty percent, after only a short time with StemEnhance. “I also noticed an improved general energy level,” he says, “and I began to see improvements in the vision challenges I have been facing.” Sean decided to begin introducing StemEnhance “slowly but surely” to his patients. His approach has been “very casual,” he notes, explaining that most people have come to him to ask his opinion about StemEnhance. “I tell them that I have seen positive results with over seventy-five percent of those taking it,” he says, “and I have seen no ‘side-effects.’”

With the help of Teresa Curtis and STEMTech’s systems, Sean’s business has grown. “I went into this with no expectations,” he says, “but I have been lucky to work with very motivated people.” A man who lives “in the present, not regretting the past or worrying about the future,” Sean believes that STEMTech is the perfect support for his “Optimal Now.”

Mitch Fields*Wellness Partners
California*

For years, Mitch has owned a successful business that sells nutritional supplements, mostly through the internet. He says that he avoided network marketing company associations prior to finding STEMTech, because too often companies marketing nutritional supplements “promised everything but could deliver very little on their promises to improve health.” Even when he heard about personal testimonials from people who had experienced dramatic benefits from StemEnhance, Mitch was still skeptical. But when a number of his retail customers started requesting StemEnhance in early 2007, he enrolled with the ProRetailer Pak so he could add StemEnhance to his inventory of supplements.

Then, he says, “the totally unsolicited, powerful testimonials from people I know and respect began to come in,” and Mitch began to believe. As the word about StemEnhance spread from customer to customer, and from one person to family members and friends, more and more people came to Wellness Partners to purchase StemEnhance. “We sell a lot of it,” Mitch says. And for a growing number of these retail customers, the STEMTech opportunity is attractive, too: So with the help of Teresa Curtis, Mitch has built a strong downline that includes quite a few business builders. “One of my employees, Sage Daily, made Triple Diamond before I did!” he says.

Since Mitch and his wife Michelle both enjoy outdoor activities that include scuba diving, the Fields are working these days to ensure that they qualify for the Diamond Dream GetAway in Cancun. “Michelle says we can do it easily,” Mitch says, “so I’m counting on being there in December!”

Ray Mikelonis*Toxic Mold Consulting, LLC
Michigan*

When Ray called his old friend Rob Cranston in May, 2007, he had just quit selling cars and was open to a new business opportunity. “Rob told me about StemEnhance® and the results he was seeing, and sent me to his WealthBuilders website,” he says. “After seeing just half the StemEnhance video, I called him back, credit card in hand, ready to enroll.” Ray’s major incentives were threefold: “It was a new company with patented technology, there were only about 25,000 distributors in the company, and the average reorder rate was over eighty percent. With numbers like that, I knew if I went to work, I’d be successful.”

Ray takes every opportunity to introduce STEMTech. At STEMTech’s Convention in April, he shared the elevator with a doctor attending a wedding at the hotel, who inquired about stem cell science, which he had been hearing discussed throughout the day. “I invited him to my room, showed him my WealthBuilders website video and gave away my first *Your Business At Home*,” Ray says, adding, “Now I have a retired hematologist/oncologist on my STEMTech team!”

Ray’s enthusiasm for STEMTech’s products has exploded since StemFLO™ was introduced. “After two weeks with StemFLO, I no longer have to back into my car’s seat and swing my legs around because of back problems,” he says. When he went shopping recently for the STEMTech BMW he wants, he “stepped into those cars like a normal person.” And he left a copy of *Your Business At Home*, with his interested salesman to share with other car-shoppers!

Dr. Pedro Miramontes

*Salud Ideal
Guadalajara, Mexico*

These days you can find Dr. Pedro Miramontes traveling all over Mexico, introducing StemEnhance® to people in large cities, small towns and tiny villages. A man who has dedicated his life to helping others achieve “salud ideal” (ideal health), Dr. Miramontes has been a practicing general surgeon in Guadalajara, and now devotes ninety percent of his efforts to spreading the good news about StemEnhance to his countrymen.

With eighteen years of network marketing experience, Dr. Miramontes says he was attracted to STEMTech because, “The product is 100% natural, and scientific studies have proven how it works to benefit the health of the body.” While his primary focus is on the product, the doctor is also building a growing organization of eager business builders throughout Mexico and the United States, with help from Izzy Matos and VP Oscar Rosas, who brought him to STEMTech a year ago.

Since the STEMTech Second Annual Convention, when the Virtual Sign-Up program was introduced, Dr. Miramontes has made good use of this innovative idea, enrolling Pending Distributors in Latin American countries. “When these countries open for STEMTech, I will be ready with a team in place,” he explains. And with a son who is a surgeon in Spain, Dr. Miramontes is looking forward to a Pre-Launch on the Iberian Peninsula, too. STEMTech provides just what the good doctor finds most fulfilling in life: “I enjoy traveling,” he says, “especially when my travel gives me the opportunity to help as many people as possible to overcome their health challenges with StemEnhance.”

Patricia Pastor

California

“With every step I take,” Patricia says, “I am thankful to StemEnhance for coming into my life.” After more than eight years of relentless discomfort that left her with little mobility, it took only a couple of weeks for Patricia to realize that “something was going on in my hip area. I was able to walk straight again!”

Patricia says that her dramatic results were just “the icing on the cake.” As a network marketing professional, she was “looking for something unique to get involved with.” She contacted Teresa Curtis, who explained the science behind StemEnhance as well as the attractive STEMTech comp plan, and Patricia says, “I knew I was in the right place at the right time to find and experience this life-changing product.”

Beginning part-time, Patricia went fulltime with STEMTech in mid-2007. She applauds STEMTech’s systems, which, she points out, have been “critical to helping build my business,” adding that “WealthBuilders and TeleCenter are two systems that give everyone the opportunity to be successful!” She explains that these systems allow her to be what she wants to be: “a teacher and ‘tour guide,’ not a salesperson.” Although she looks toward achieving President’s Club next, Patricia says she would rather focus on the success of her downline: “I want to help them all become millionaires,” she says.

STEMTech’s recent Convention suited Patricia just right: “Unlike other companies’ conventions, it was a hype-free, straightforward strategy session that said, ‘Here’s where we are, here’s where we’re going... Now let’s get started!’ I love that sort of business realism!”

**In their own words...**

“I have been lucky to work with very motivated people.”
Dr. Sean Devlin

“Michelle says we can (qualify for the Diamond Dream GetAway) easily, so I’m counting on being there in December!”

Mitch Fields

“After two weeks with StemFLO™, I no longer have to back into my car’s seat and swing my legs around because of back problems.”

Ray Mikelonis

“I enjoy traveling, especially when my travel gives me the opportunity to help as many people as possible to overcome their health challenges with StemEnhance.”

Dr. Pedro Miramontes

“With every step I take, I am thankful to StemEnhance for coming into my life.”

Patricia Pastor

As of June 15, 2008, our StemGem Team numbers 254 members!

Carmen Cameron

*Diamond Director
Florida*

A Jamaican living in Florida, Carmen confesses that she was not at all receptive when a friend tried to introduce StemEnhance to her. But she agreed to listen in on a conference call, she says, “and that changed my mind.” She began taking StemEnhance, but had no plans for building a business, partially because her husband Cliff was not convinced there was anything to StemEnhance.

All this changed when a friend of the Camerons experienced a remarkable result with StemEnhance. “We both knew how limited her life had become,” Carmen explains, “so when we saw that she had regained a good quality of life, thanks to StemEnhance, we were both won over.” Cliff began taking the product daily, and now helps Carmen with the business. “He talks to people at his Jamaican running club, explaining the benefits athletes experience with the product,” Carmen says, adding, “We are both great believers in this product.”

Carmen and Cliff travel frequently between Florida and Jamaica, sharing StemEnhance wherever they are. Recently, Carmen joined the happy group in attendance at the Taiwan Pre-Launch, “so now we have new contacts in Asia,” Carmen says.

STEMTech’s Second Annual Convention reinforced the good feeling Carmen has had about the company ever since she attended the First Annual Convention. “I am so impressed with Ray and Christian,” Carmen says. “These are people who have heart and soul. We are fortunate to have them leading this company.” And Carmen feels great gratitude to everyone in her organization, saying, “I’d like to thank all of them for using the product, believing in the product and being smart enough to seize a good opportunity when they saw it!”

Tom and Cheryl Goff

*Sapphire Directors
California*

It was January 21, 2008, when Tom and Cheryl decided to become part of the STEMTech family, enrolling with the Director Pak. “After analyzing the business opportunity,” Tom says, “we saw right away that starting with the Director Pak is the way to go. It’s just math... With the 81-bottle inventory, you can make a great profit selling at retail, and selling

wholesale is still good money.” Cheryl explains that they provide a good example for people they sign up, also. “When the entrepreneurs we approach consider their options, we can say, ‘We did it with the Director Pak. You can, too.’” Many of the entrepreneurs in their downline have enrolled with the Director Pak.

When Tom was introduced to STEMTech, he was very interested in the science behind StemEnhance, and decided to learn all he could about how the product works with stem cells in the body. Since he and Cheryl had been out of network marketing for nearly ten years, they had no “ready downline” at their fingertips, so, Tom says, “We started from zero, working our warm market.” They soon had ten legs, five of them very strong. “One of our stronger legs includes a very aggressive networker who understands the power of three-way calls with his upline to speak to prospects,” Cheryl says, “so he and Tom worked together extensively. Most of the people they approach enroll, and many of them are health care professionals!”

Cheryl says, “STEMTech has completely changed the direction of my life. At StemTech’s Annual Convention, I was so impressed that I decided to focus on building this business with my husband. We love sharing StemEnhance with people everyday and watching the many ways it improves people’s lives!”

Jerry Lindsey*Ruby Director
Texas*

Over more than forty years in network marketing, Jerry has been involved with all sorts of products and the companies marketing them. Since October, 2005, when he first heard about StemEnhance and STEMTech, however, he has been single-focused: "StemEnhance is the top single product in the world," he says, "and it has a very strong company behind it." He notes that the retention rate with STEMTech is one of the highest in the entire network marketing industry, and with good reason: "Everybody needs StemEnhance – and now StemFLO, too," he says. "That means that STEMTech is a great network marketing opportunity."

Jerry says he does "tons" of three-way calls, "way deep" in his organization, explaining, "I want everybody to be successful. Everyday I wake up and ask myself, 'Who can I help today?'" He says that it is important for new distributors to get an organization twenty wide on AutoShip as fast as they can. "When I get a leader on whatever level," he says, "I work with them, especially during the first month, until they have enough footing. I believe that the key to building a successful organization is staying with your people, teaching them how to make the best use of the comp plan."

Since April, Jerry has been making good use of the June issue of *Your Business At Home*, "in re-approaches to some people who could not see the value of STEMTech earlier. "One fellow was almost dancing... He had wanted to do the business all along, but his wife had said no. When she saw the magazine, everything changed. They came in FastStart!"

Joining Chairman's Club member Teresa Curtis and President's Club members Ian & Melony Davies and Bill & Caroline Lohmeyer are:

- 57 Triple Diamonds**
- 33 Double Diamonds**
- 19 Diamond Directors**
- 51 Ruby Directors**
- 91 Sapphire Directors**

Each issue of HealthSpan will spotlight the accomplishments of several StemGems, as we welcome StemGems new to the Team. Congratulations to all StemGems and Best Wishes for continuing Growth and Prosperity!

Continuing... The Journey

They came from all over North America and from Puerto Rico, Mexico, Jamaica, the UK, South Africa and other countries half a world away. While they began their journeys in many different places, every STEMTech traveler had two things in common:

- Their Destination: STEMTech's Second Annual Convention, and
- Their Objective: To learn what's NEW and HOT with STEMTech!

In three days filled to capacity with enlightening General Sessions, valuable training seminars and memorable social activities, STEMTech distributors met their Objective... and then some! President & CEO Ray C. Carter, Jr., used a series of "What If" to introduce **What's New and Hot...**

What if... You could build a virtual downline of Pending Distributors anywhere in the world?

Introducing... STEMTech's **Global Recruiting** with virtual signup!

What if... You could sell retail to 27 countries in Europe?

Introducing... **EU Retail Direct**, opening the door to retail sales to all nations of the European Union!

What if... People speaking English, French, Spanish, Mandarin and Korean could understand *The STEMTech Story* DVD?

Introducing... *The STEMTech Story Global Edition*, with five language choices on one DVD!

What if... STEMTech could take our public relations strategy to a higher level, with company exposure in large bookstores all over North America?

Introducing... *Your Business at Home* magazine, an independently produced, prestigious national periodical that devotes the June issue to one company, STEMTech!

of a Lifetime

What if... STEMTech science could produce a new product with a patent-pending formula that optimizes the effects of StemEnhance by promoting optimal blood circulation and providing the best antioxidant formula available?

Introducing... StemFLO™

With help on stage from VP George Antarr and Chief Science Officer Christian Drapeau, Ray's What If's became the stuff of legend almost before the cheering from the huge audience had died down. And who can forget Ray's Travelogue, where a little computer wizardry placed Christian and Ray in comical situations around the globe, including a Tarzan-like swing through the trees, a rickshaw ride and Christian in Jamaican dreadlocks? For you who were there and saw everything first-hand, this was a weekend full of excitement. The photographic memories on these pages will be good traveling companions as you continue your **Journey of a Lifetime with STEMTech.**

HONORING OUR BEST AND BRIGHTEST

SPIRIT OF SERVICE AWARD

Izzy & Lori Matos

STEMTech EMPLOYEES OF THE YEAR

George and Donna Antarr

Postcards from Taiwan

by Jonathan Lim, VP Asian Markets

Since our successful Pre-Launch celebrations, our office has been visited by many potential distributors. The US Asian leaders, who stayed on for a few more weeks, recruited many distributors in Taipei, first introducing StemEnhance® to them and afterward bringing them into the office. Once they visited our sparkling, professional offices and experienced *The STEMTech Story* in Mandarin, they signed up.

To ensure that new enrollees have a good start, we hold seminars everyday in our meeting rooms, training distributors in the business opportunity, the product and the compensation plan. These seminars have been averaging about 30 to 40 people in attendance.

I have been concentrating also on training our office staff, headed by GM Sampson Chu, in all areas of service. It is important that everyone working at our Taipei office knows how to explain the compensation plan and the basic science about our product, so they can answer questions from new distributors. We are currently updating our websites to ensure that we maintain compliance with regulatory agencies; and we appreciate the patience of stateside distributors during this process.

With more than one hundred new distributors on board, we are seeing distributors in the rank of Director and Executive Director appearing in our reports. As we are still in the infancy of our Taiwan operation, it is very exciting for us in the Taipei office when we see each new Director and Executive Director advancement. We anticipate many more advancements to come!

Many North American leaders who attended the Pre-Launch tell me they are still excited about STEMTech's opening of the Asian continent in Taiwan. I enjoy their encouraging emails. Triple Diamond Marijke Long wrote that she had never before had an experience like the Taiwan Pre-Launch, saying, "This type of experience you can't buy with money!" I am humbled by her kind words and those of many others. After all the hard work we put into preparations for the Pre-Launch in a very short timeframe, we are pleased that things turned out well, and that STEMTech has had a wonderful introduction to Asia.

Taiwan Pre-Launch Memory

by Coleen Hatashita

It was so exciting to be able to witness history in the making, as StemEnhance came to Taiwan. I was happy to be there to welcome STEMTech HealthSciences to Asia. We could all feel the excitement building as Ray and Christian prepared to cut the red ribbon. Everybody looked so handsome in their white gloves and tropical boutonnieres! When the ribbon was cut, STEMTech was officially opened, and the noisemakers added merriment to the celebration.

Many STEMTech leaders from the United States helped to make this special day a great success. All of us who traveled to Taiwan agreed that the people of Taipei are especially pleasant and helpful. We had fun shopping – in quite fashionable stores – and sight-seeing, and we even played ping-pong. We enjoyed it all. The Taiwan Pre-Launch was an experience to remember!

Introducing a Patent-Pending Novel Formula to Optimize Stem Cell Circulation

StemFLO was designed essentially to do two things to promote optimal blood flow and circulation of stem cells in the body:

- 1 To reduce existing fibrin in the blood; and
- 2 To prevent the formation of fibrin.

StemFLO™

by Christian Drapeau

Fibrin is a molecule normally produced in the blood as part of the coagulation process, to stop blood flow after an injury. During an injury, the damaged tissue activates a complex multi-step process leading to the formation of fibrin and then the cross-linking of fibrin strands to form the final blood clot.

But the formation of fibrin in itself is just one step in this complex multi-step process, and without the full activation of the coagulation cascade, the formation of fibrin does not lead to full blood clot. It simply leads to the presence of free-flowing fibrin mesh in the blood. This is what happens when there is oxidative stress in the blood. Free radicals in the blood lead to the formation of fibrin mesh whose size can at times impair optimal blood flow. Fibrin mesh can reduce blood flow through capillaries and prevent the circulation of stem cells in certain areas of the body, depriving these areas of the natural process of renewal. Therefore, the two main strategies to support stem cell delivery to every tissue of the body are to eliminate the presence of fibrin mesh and to prevent its formation when it is not needed to repair an injury. To do so, we have created StemFLO, a blend of fibrinolytic enzymes (fibrinolytic: that cuts fibrin) and powerful antioxidants.

Because many products exist on the marketplace designed to increase the fibrinolytic activity of the blood and to provide strong antioxidant properties, our mission with StemFLO was to search for the best quality available, and that's what we did. Most antioxidants are tested using a laboratory procedure that measures antioxidant capacity in a test tube, not in a living cell. These tests provide interesting information, but the results do not say anything about the effect of a specific antioxidant in the body, where it matters. So we used a novel assay called CAPE (Cell-based Antioxidant Protection in erythrocytes), and equipped with this assay during nearly three years we searched for the most effective ingredients available.

Mangosteen

We discovered a unique location in Southeast Asia and developed a relationship with a farm that produces the top quality mangosteen crop, the only organically certified mangosteen available. When tested against some of the most popular sources of mangosteen on the marketplace, our source tested up to twenty times more potent. Likewise, we tested several sources of cat's claw, one of the most powerful antioxidant herbs available, and found the one with the most potent antioxidant and immune-supporting properties. Finally, working in collaboration with scientists in the field of berries and polyphenols, we developed a berry extract that provides one of the highest concentrations of polyphenols so far tested. And we completed this formula with curcumin and rehmannia, two botanical ingredients that are not yet generally known by most people, but that are very well known in herbal sciences for their antioxidant properties and their ability to help purify the blood and support optimal blood circulation.

What is novel in the StemFLO formula is the blend of powerful antioxidant and fibrinolytic properties, aiming at supporting optimal blood flow in the capillaries to optimize stem cell delivery to every tissue of the body. The novelty of this approach is such that a patent has been filed on StemFLO, concentrating on the physiological effect of blending together strong antioxidant and fibrinolytic botanical ingredients.

Now, this is all good theory, but how can we determine whether StemFLO effectively improves blood circulation in the body? There are many tests to measure blood circulation, but only one that can effectively measure circulation in the capillaries, the smallest blood vessels where stem cell migration takes place.

Coagulation Process

Fibrin Mesh in Blood

“When a tissue or blood vessel is damaged, the coagulation process leads to the formation of fibrin mesh at the site of the injury. The fibrin mesh captures red and white blood cells, forming a plug that stops the blood loss from the blood vessel.”

“With excessive oxidative stress in the blood, fibrin mesh can develop in the bloodstream, without injury, and impair optimal blood flow.”

One of the blood’s main roles is to carry oxygen to every part of the body. The network of capillaries is so extensive that most tissue cells lay within 3-4 cells from a capillary. When there is optimal blood circulation, the delivery of oxygen is plenty and oxygen diffuses through the tissue. It is possible to monitor this phenomenon by measuring the amount of oxygen released through the skin by the capillaries located in the superficial layers of the skin. However, when oxygen delivery is impaired by reduced blood flow through the capillaries, the level of trans-cutaneous oxygen can fall significantly. Therefore, we measured the amount of oxygen released through the skin before and after consumption of StemFLO

When an individual lies down and rests, the lack of movement slowly reduces the amount of blood flowing through the skin, and there is a normal reduction in trans-cutaneous oxygen (as the blue line shows in the graph). When StemFLO is given to individuals, within twenty minutes there is a reversal of that phenomenon, indicating an improved blood circulation through capillaries. By digesting fibrin in the blood and preventing fibrin formation, StemFLO promotes optimal capillary circulation throughout the body.

So what is the best way of taking StemFLO? It is important not to take StemFLO at mealtime. When StemFLO is taken with a meal, the enzymes would be somewhat consumed during the process of digestion. It is also important to take StemFLO along with StemEnhance®, so that the stem cells released from the bone marrow can best take advantage of the improved capillary circulation throughout the body. If a person wants to take additional StemFLO to further improve blood circulation, it is probably better to take it more often during the day than to take more capsules at once.

Blood coagulation can be triggered by irregularities in the cardiovascular system (intrinsic system; top left) or by actual injuries to tissues (extrinsic system; top right). Both systems lead to the activation of a series of compounds whose common end point is the transformation of prothrombin into thrombin, and then the transformation by thrombin of fibrinogen into fibrin mesh. During the normal coagulation process, the formation of thrombin also triggers the cross-linking of fibrin to complete the formation of the blood clot. When fibrinogen is transformed into fibrin mesh by the action of free radicals, this isolated process does not lead to full blood clot but simply to soluble fibrin mesh floating in the circulation.

Measuring the level of oxygen that permeates through the skin is an accurate way of estimating capillary blood flow. Upon lying down, it is normal to see the level of trans-cutaneous oxygen decrease (blue line). In this situation, any change in capillary flow can be detected as an increase in trans-cutaneous oxygen release. Within minutes after consumption of StemFlo, capillary flow is significantly improved (red line). Lines represent the average of three tests in one individual.

Dr. Joyce Johnson*Wellness Center of America
California*

An expert in hematology, Dr. Joyce was a guest on a cable TV show about breast cancer, hosted by Ethel Lover. Because Ethel knew of Joyce's great fascination with the science of adult stem cells, she called Joyce later to introduce her to StemEnhance®. Dr. Joyce and her son began taking StemEnhance, and she began recommending it to her clients at the Wellness Center. "When I saw improvement in myself and my son, who has serious health challenges, and when my clients reported dramatic results, I realized at once that this is real," Dr. Joyce says.

Even though she had "made a vow years ago never to be involved in network marketing," Dr. Joyce says the STEMTech opportunity was not to be denied. "StemEnhance is so unique, a wonderful, patented product," she says, "and I truly believe that it is the most amazing medical and nutritional breakthrough that any of us will ever see." What's more, she notes, "STEMTech is a ground-floor opportunity for us. How could anyone say no?"

Since Dr. Joyce is kept very busy caring for clients at her Wellness Center, she is especially grateful for the support of Patricia Pastor, who has helped her with "the business side of things," as she develops her STEMTech organization. Recently, 76-year-old Dr. Joyce sent out 12,000 postcards to her Wellness Center database, with the photo of herself swimming with dolphins and a simple message: "Dr. Joyce says StemEnhance keeps her young!" Since then, she says, "The phone never stops ringing... Everybody wants to know about StemEnhance!"

Irene Masci*Florida*

Like many people, Irene was unaware in late 2005 that we humans have stem cells in our bodies. But she was intrigued by the breakthrough science behind StemEnhance, and she was highly motivated to learn everything about the unique product and the associated business opportunity. Having recently lost a daughter to cancer and facing some physical problems herself, Irene wanted to

pursue a regimen of wellness supported by StemEnhance. As she was also struggling to make ends meet on Social Security alone, she looked to the STEMTech opportunity to help her financially.

"I made a commitment to myself," she says, "that I would get on every conference call the company had, so I could learn the business," and to this day she attends every training event in the Orlando area, "so I can learn more." Irene approaches people, telling them, "I can help you to be on your way to wellness free," and handing them a brochure. Nowadays, she also uses *Your Business at Home* in approaches. "My picture's on page 49!" she says happily.

In October, 2006, Irene's call to Joan and Sam Reid, a couple recently relocated to Florida from Jamaica, had life-changing results: When the Reids saw dramatic results from StemEnhance in themselves and their son, they shared their excitement with Dr. Lana Riettie, a fellow Jamaican living in Florida. "And," Irene says, "The rest is history!" explaining that Dr. Riettie has been a major motivating force behind STEMTech's Pre-Launch in Jamaica, and noting, "Practically all of the distributors in Jamaica are in my downline!"

**Chris Rucker***Abundant Life Ministries
Florida*

It is very hard to catch up with Chris Rucker, because she is usually off somewhere in the United States or abroad, presenting health education and lifestyle seminars for church groups. Her weekend classes

stress the importance of a lifestyle that includes exercise, proper nutrition and dietary supplements. A wellness educator since 1970, Chris took her message into the spiritual realm in 1983. "Wellness and spirituality are a perfect fit," she explains.

Chris says, "I have always been looking for one product that could do a lot for the body, a product with mass appeal." Since Susan Oravsky introduced her to StemEnhance last year, Chris says, "Now I have the perfect product to recommend to everyone in my seminars... It's one simple, green food that is all they need to supplement their healthy diet." She is thankful for the introduction of StemFLO™, too, she says, because "it is the ideal companion for StemEnhance. Together, they deliver good health to every part of the body!"

StemEnhance and StemFLO have been blessings for Chris personally, with her very busy schedule of traveling and speaking. "It used to be," she says, "that I would come home Sunday night completely wiped out, and it took all day Monday for me to recover. Since StemEnhance and StemFLO, I have been doing engagements, making calls and holding meetings on Mondays. What a wonderful difference!"

These days Chris is especially excited that she is "almost qualified" for Cancun. "Some of my Diamonds will be going with me, so we all share the trip of a lifetime!"

Jeff Schofield, D.C.

*The Liamb's Den
Illinois*

Jeff Schofield's connection to Taiwan began back in the late Seventies, when he served there as a missionary and became fluent in Mandarin. In 1983, he returned to Taiwan on a successful quest to locate the aged mother of a friend, and he has wanted to return to the

country ever since.

His opportunity came in May, when Jeff joined the celebratory Pre-Launch of Taiwan, staying on in the country with the family he had come to know on his first two visits nearly thirty years ago. "The opportunity in Asia is awesome," he says, "and with my ability to speak Mandarin, I hope to develop a large group there." He and his wife Claire plan to return to Taiwan together to teach English part-time and do their STEMTech business fulltime. He feels that StemEnhance® is a perfect fit with the Asian approach to wellness. "I see StemEnhance as a blessing which will awaken the forgotten memory of the oneness of all humanity, as recorded in the adult stem cell," he says.

Educated as a chiropractor and working recently as a welder – both professions well-rooted in his ancestry – Jeff meets people from many walks of life. Recently, he has been introducing StemEquine™ to people in the farrier profession, after seeing exceptional results in breeder Craig Kelly's two trotter stallions. "They were both facing health challenges that threatened to have them put out to pasture," Jeff explains. "StemEquine brought both of these stallions back into the game, performing like stallions of three to seven years of age!"

Lena Schultz

Manitoba

When long-haul trucker Tony Schultz experienced a sudden problem with his vision that left him unsure about his career in mid-2007, Lena says, "We were

backed up against a huge 'What if?' Trucking is what my husband had done for twenty-seven years, so he knew no other way to make an income." When Martin Thiessen suggested that StemEnhance might help with the 'What if,' the Schultzes were highly skeptical, but agreed to try it. Two weeks later, when Tony's vision had improved dramatically, Lena says "My belief went from zero to sixty! We signed up FastStart right then, and a week later upgraded to the Director

Pak." Lena called her mother, Mary Peters, to share the news about StemEnhance and the STEMTech opportunity.

Lena's business took off like a rocket. "All I did was share my husband's story with people, and nine out of ten usually signed up," she says, adding, "By the time my order arrived, most of it was already spoken for!" Lena realized she would need to do the STEMTech business fulltime, because, "I need to be there for my new enrollees." When it became a challenge to get back to people she had approached or enrolled, Lena made a decision. She removed her traveling clothes from Tony's truck. "I'm done with trucking," she says.

Lena keeps motivated by the many positive results her distributors and customers have with StemEnhance. She looks toward a day when she and Tony can "just enjoy life," noting, "With STEMTech that time is not far off for us."

Mary Peters

Ontario

Lena Schultz's mother, Mary Peters, is "an awesome networker," Lena says, "but she will agree to market only products she can believe in

100%." Both Mary and her husband Cornelius were dealing with some challenges common to their senior citizen status, so Lena's call about StemEnhance was a godsend for them, although they felt it was "too good to be true" at first. Mary says, "I believed Tony's story and shared it with my friends. Soon I saw results for myself and learned about StemEnhance science. Since then, I have believed 100% in this product. When I tell people that StemEnhance is the only product they need, they believe it, too."

Because fifty percent of Lena's and Mary's distributorships is comprised of Canadians and Mexicans who speak Low German, Lena has created many of their materials. "Nearly ninety percent of our people do not use computers, either," Mary says, "so we use the telephone a lot, and we hold home meetings, which are especially effective with the many Amish distributors we have."

Although they live in different provinces, Lena helps her mother build her business. "Lena and I have done meetings together and separately," Mary says, adding, "Lena handles most of the computer work for both of us." Since Mary and Lena have had only one "real" vacation that was not visiting with family, mother and daughter are really excited these days, as Mary explains: "Our work has really paid off for us... We're both qualified for the Cancun trip!"

““
When we
started talking
about stem
cells, a
cardiologist
who was seated
across the aisle
also joined in
the conversation
””

Dr. Enrique Martinez

Dream Builders

Puerto Rico

Since he is a well-known doctor who has been a top-earning, motivating force behind STEMTech's success, especially in Puerto Rico and Mexico, you may think that Dr. Enrique Martinez would not necessarily need or want any new marketing tools. Not so! When STEMTech corporate executives asked him to pre-test the effectiveness of the June issue of *Your Business at Home* magazine, Dr. Martinez jumped at the opportunity, and reports that "it was awesome to see how people react to the magazine."

On the airplane from San

Juan to Garden Grove for the Convention, his seatmate became frustrated when she could not read well over his shoulder, Enrique says, "so she asked me to loan her the magazine. When we started talking about stem cells, a cardiologist who was seated across the aisle also joined in the conversation." Within a few minutes, both of these passengers

showed great interest in StemEnhance® and the STEMTech opportunity, Enrique reports, noting, "It was all because I was reading *Your Business at Home* in a public place." He says that his airplane experience goes to show that the magazine is an excellent tool to use with cold markets.

"*Your Business at Home* is also the perfect tool to use with people you approached before but who may have been either not interested or not ready," he points out. "With this magazine, they can see first-hand that STEMTech has achieved a standing in the industry that merits their attention. *Your Business at Home* makes recruiting simplicity itself"

Susan Darbro

Florida

Even though she is a retired nurse, Susan says she is "The Original Junk Food Junkie." She says, "I know what to do when it comes to food, but I just don't do it. I love white flour and sugar!" As a result, Susan says she has been overweight, has had no energy and has been easily winded, especially on stairs.

Married to Dr. David Darbro, whom Susan describes as "The Original Health Food Junkie," Susan is no stranger to foods and supplements that promise simple, painless solutions leading to a healthier lifestyle. But she was very skeptical about what STEMTech's new product could do, when she and David were asked to pre-test StemFLO early in the spring.

"To my amazement," Susan says, "in only three days I noticed an increase in my general sense of well-being." After two weeks on the product, Susan was shocked to realize that she was not out of breath when she climbed the two flights

of stairs between her husband's office in the basement and her own office on the second floor. "I had such an increase in stamina," she says. "It was really amazing!"

After the pre-test, the Darbros had to wait for the introduction of StemFLO™ at the Convention to buy the product. During that hiatus,

Susan happened to experience the sort of extreme stiffness in her neck and back that she had battled off and on for years, as a result of injuries. Only a few days after resuming StemFLO, she once again experienced the feeling of wellbeing and increased stamina as before, but, she says, "I was also able to move around with ease for the first time in weeks!"

Susan takes StemFLO three times a day, after breakfast, at noon and in the evening, and credits STEMTech's new product with helping her go from a "glass half empty" to a "glass half full" type of person. "StemFLO has definitely increased my quality of life," she says. "I am really excited about this product!"

““
In only
three days
I noticed an
increase in
my general
sense of
well-being
””

“
The
magazine
gives us the
credibility
that everyone
has been
looking for
”

Sal and Val Vaccaro

New York

When Sal and Val want a change from their lives in the Northeast, they head for their condo in Ft. Myers, Florida. Over the last couple of years, the Vaccaros have put their “vacation” time to good use, holding opportunity meetings to introduce StemEnhance® and STEMTech to their neighbors, some who are fulltime Floridians and some who are fellow “snowbirds.”

For more than a year, however, they have been unable to get their condo realtor to attend a meeting. “She has put us off, even after she

watched the DVD and knew that other people were reacting positively to our meetings,” Val says. They were about ready to give up on her, when Sal showed her *Your Business at Home*, flipping to page 18, where Izzy and Lori Matos are profiled. “Sunny has met Izzy and Lori and we have talked about their life change with STEMTech. But seeing their

story in a national magazine made a big impression on her. It validates what we have been saying. She came to our next meeting with her daughter, and they both signed up!”

Back in New York, Sal and Val have found that *Your Business at Home* has rejuvenated their business at home. “The magazine gives us the credibility that everyone has been looking for,” Val explains, adding, “Lots of the ‘inactive’ people in our downline are coming back because *Your Business at Home* has piqued their interest again. It is a great tool for recruiting and rejuvenation. We love it!”

Mark Parsekian

*M. Parsekian & Associates
Massachusetts*

“Athletes are always looking for ways to improve their performance,” runner Mark Parsekian says. Therefore, he was eager to discover whether STEMTech’s new product would have a noticeable effect on his training regimen, when he agreed to be part of the pre-test of the product this spring. He had not run for several weeks, had gained a little weight, and knew he needed to get back into condition.

He began the pre-test and resumed his training at the same time and watched carefully for results. “From the beginning, I had more energy, focus and concentration,” he says. “I could do workouts to a greater level, and I did not labor so intensely. During trial

runs I was not gasping for breath... It was as though I had more oxygen reaching all the cells of my body.” Marks explains that oxygen is especially important for athletes, because its delivery to the body’s cells is critical for achieving the optimal state of performance

Now back on a routine of training for competitive running, Mark has made StemFLO™ an integrated part of his daily regime. “With StemFLO,” he says, “it feels like my body is ‘functioning on all cylinders’ like a well-tuned machine.”

“
I could do
workouts to a
greater level,
and I did not
labor so
intensely
”

“
I can go another
twenty years.
I’m sold on
these products!
”

Donna Akins

Florida

At 72, Donna says she is “basically healthy,” explaining that “I’ve always been the active ‘tomboy’ type.” Relocated from Florida’s East Coast to the Gulf Coast after the death of her husband, Donna now lives close to her son, who has a thirteen-year-old Border collie who loves StemPets™. “We

want to keep the dog going as long as we can,” Donna says. “We know that StemPets twice a day will help him live a good long life.”

Also a fan of S T E M T e c h ’ s products for people, Donna has been taking StemEnhance for over a year, and recently added StemFLO to her daily regimen. While she has felt a

general and gradual result from StemEnhance, her experience with StemFLO was quick and dramatic: “Soon after I took my first two capsules, I felt a pleasant warmth from my feet to my head and back down again. It was as though all my pipes were opened up, and I felt really good.” Now taking StemFLO daily along with StemEnhance, Donna says, “I feel like I can go another twenty years. I’m sold on these products!”

Director Leadership Conference

August 21-24, 2008

Don't miss the opportunity to be part of it all! Three days packed with 30 hours of team-building and intensive training, including:

- The Number One activity that creates the most new distributors
- The 5 questions all prospects ask themselves
- How to recruit with NO rejection
- How to recruit more Business Builders
- Making leads work for you
- How to build teamwork in your downline
- The science of STEMTech products
- Explaining the compensation plan (without putting people to sleep)
- And much more!

And it all happens at the gorgeous Laguna Cliffs Marriott Resort and Spa in Dana Point, CA. Join Ray, Christian, Donna, George and top Field Leaders from the StemGem Team for three rewarding days of training, luxury and FUN.

Go to teamstemtech.com and

REGISTER TODAY!

DIAMOND DREAM GETAWAY

December 1 - 7, 2008
Cancun, Mexico

ALL FUN AND RELAXATION! NO MEETINGS!

Summer is the perfect time to work hard and qualify for the luxurious winter vacation of your dreams! Join STEMTech Executives and Top Producers for relaxing days in the Mexican sun and beautiful nights under the Mexican moon. The magnificent Fiesta Americana Grand Coral Beach Resort will treat you like royalty as you enjoy every amenity of this splendid resort. And there are many nearby shops for all your Holiday shopping!

NEW! Last Chance Qualification Updates:

TRIPLE DIAMOND DREAM GETAWAY

Create & maintain 7 new* Active Director legs for three months** with 50,000 OGV to win an all-expense-paid

SIX-NIGHT/SEVEN-DAY LUXURY VACATION

DOUBLE DIAMOND DREAM GETAWAY

Create & maintain 6 new* Active Director legs for three months** with 25,000 OGV to win an all-expense-paid

FOUR-NIGHT LUXURY VACATION

DIAMOND DREAM GETAWAY

Create & maintain 5 new* Active Director legs for three months** and 15,000 OGV to win a **FOUR-NIGHT STAY**, including meals and some "extras," at the **LUXURY HOTEL**.

* "New" refers to enrollment since September 1, 2007. To qualify for any GetAway, you must have 20 new Business Builders enrolled in the contest period. Find complete rules for the Diamond Dream GetAway contest at www.teamstemtech.com.

*** Last-Chance Extension: Distributors qualifying in July and August may meet the three-month qualifying period with the Extension Months of September and October.
HURRY... Qualify in July and August to be eligible for the Last-Chance Extension!*

SAVE THE DATE!

Start planning now to attend...

STEMTech's THIRD ANNUAL CONVENTION

April 2-4, 2009

Anaheim Marriott, Anaheim, CA
