

RAPID RENEW STEM CELL PEPTIDE NIGHT CREAM

CELLECT ONE™

What is CELLECT ONE™ - Proprietary Stem Cell Night Cream?*

CELLECT ONE™ is scientifically backed advanced skin proprietary formulation, enriched with a potent FDA approved and patented ingredient known to awaken skin's youthful potential. Your body's defense system naturally blocks peptides from entering the body. Our CELLECT ONE™ plant-based stem cell proprietary blend significantly lowers the defense mechanism enabling the delivery of peptides to the dermal layer, where collagen and elastin are the structure that maintain skin elasticity and firmness.

We discovered the most unique way to rejuvenate the skin and regenerate healthy tissue through a patented ingredient QXP, derived from Red Oak. It has been clinically proven to down-regulate MMP's (matrix metalloproteinase) and penetrate the cells to increase even more collagen and elastin production. Help your skin repair signs of aging while you sleep. Upon waking, skin looks more youthful, bright and feels smoother.

How is CELLECT ONE™, the proprietary Stem Cell Night Cream, different from other creams and lotions marketed to fight the signs of premature aging of the skin?

Moisturizers are used to rehydrate the skin. CELLECT ONE™ contains our proprietary formula and patented ingredients providing renew and repair nutrients into the skin. Most moisturizers feel very soothing on the skin and take away that tight and dry feeling after cleansing and applying serums. Think of moisturizers to quickly deliver moisture to the outer layer of the skin. While moisturizers feel wonderful and do provide benefits, they can't totally repair the skin if it is weak and impaired.

How does CELLECT ONE™ work at the cellular level?

Elements in the formula of CELLECT ONE™ provide an ideal environment for regeneration of the skin. CELLECT ONE™ is proven to support skin stem cell activity and contribute to an optimal cellular environment for building new skin.

Are animals used in the testing of the product?

No, we do not test products on animals. We only test our products on humans. Please feel at ease when using CELLECT ONE™ cream, as we love animals and do not engage in animal testing, nor do our product formulas contain any animal derived ingredients.

Do we use animal or human stem cells in our product?

No, we do not use human or animal stem cells. We use several plant stem cells in our formulation to deliver the necessary building blocks needed for optimum skin health.

FAQ

What if I accidentally ingest the product?

This product is not intended for internal consumption. Should the product be ingested, rinse, expel and you should have no issues.

What if I get the product in my eyes?

This product is not intended for internal use. Should the product end up in your eye simply rinse, expel and you should have no issues.

Is the product FDA approved?

CELLECT ONE™ was manufactured to meet strict FDA guide-lines but does not need an FDA approval as a skin care product.

Is there gluten in the product?

No, there is no gluten in our product.

Are there any GMO's (genetically modified ingredients) in the product?

There are no known GMOs in the CELLECT ONE™ product line.

How often should I use the product?

Recommended use is daily for best results.

How long will 30 ml of this product last?

30 ml of the CELLECT ONE™ should last approximately 30 days. Approximately 5 pumps equal to 1ml. Some users apply the product twice a day as desired.

When is the best time to use the product?

Before bed after washing the face and hands. May be applied in the morning after washing or showering.

Can I use this product under makeup?

CELLECT ONE™ is not designed to be part of makeup routine, but this is a personal choice. Product viscosity may be heavier than desired for underneath cosmetics.

Will this product oxidize over time?

The product is packaged in an airless pump to reduce oxidation and contamination
