

se3-R

Invite Nature to be a part of your daily lifestyle!

Stemtech was pioneer to discover a ground-breaking way to support everyone in their daily lifestyles. Our Advanced Formula now brings a new discovery to the forefront featuring a unique formulation.

se3-R is a new food supplement composed of Undaria pinnatifida extract (Fucoidan), Cordyceps sinensis which composed se2®, and two new ingredients have been added to improve the formula. As a consequence, Astragalus membranaceus extract and Curcuma longa extract (Turmeric) were chosen.

se3-R presents four nutritional advantages:

- **Release step:** Our new exclusive blend of Undaria pinnatifida and Cordyceps acts in synergy.
- **Immune system:** Astragalus membranaceus root and Curcuma longa extract contribute to body defenses against external agents.
- **Oxidative stress:** Fucoidan and Curcuma longa extract contribute to the protection of cells against oxidative stress.
- **Tonifying agent:** Cordyceps sinensis and Astragalus membranaceus root are used in Chinese traditional medicine as natural stimulating agents.

| FEATURES | BENEFITS |
|----------------------------------|---|
| Undaria pinnatifida (Fucoidan) | A marine-brown algae, also named Wakame. The extract used in se3-R formula is rich in fucoidan. It is rich in proteins (14g/100g) and in fibers (30g/100g). Undaria pinnatifida is source of vitamins (A, B1, B2, C), and minerals, such as calcium and magnesium. Fucoidan, the active substance of the extract, is a sulfated polysaccharide also present in other brown algae. |
| Cordyceps sinensis | A fungus that naturally grows in the high plateaus of Tibet, Nepal and parts of China. In Chinese traditional medicine, it is used as a tonifying agent and adaptogen. It contains cordycepin, nucleosides and a significant amount of polysaccharides as active substances. The chosen cordyceps extract has been genetically tested by independent labs and contrary to other Cordyceps sinensis extracts, it is not genetically altered from the wild species. It is certified Organic by the USDA agency. |
| Astragalus membranaceus extract | Astragale root is used in Chinese traditional medicine. The biologically active ingredients are polysaccharides, tri-terpenes glycosides and flavonoids. In particular, Astragaloside IV, a specific extract from the root also present in se3-R, has been chosen. |
| Curcuma longa extract (Turmeric) | Curcuma longa is an Indian spice, extracted from the rhizome of the plant, which is widely used with distinct traditional roles. Besides its well-known use in foods preparation, it is used as a natural colorant and plant in Ayurvedic medicine. The main active ingredient is curcumine, the principal curcuminoid naturally present in the rhizome. Its bioavailability in the body is increased with piperin, a natural component of black pepper. |

INGREDIENTS / LABEL

CONDITIONS OF USE:

Do not exceed the stated recommended daily dose. Food supplements should not be used as a substitute for a varied and balanced diet and a healthy lifestyle. Keep in a cool, dry place. Do not exceed 30°C. Avoid excess humidity for long periods.

CAUTIONS AND WARNINGS:

Store out of the reach of young children. Do not give to children under 12 years old. Not advised for pregnant and breastfeeding mothers. It is recommended that you consult your physician if you are under a medical treatment or on medication for any illness. No extended use without a health specialist advise.

Gluten free, no artificial colour, no artificial flavour, no dairy product, yeast or preservatives.

FAQ

Can se3-R be taken with other Stemtech products?

Yes, Stemtech products are designed for complete support, working in synergy. se3-R supports the Release, StemFlo® stimulates the Circulation, and ST-5™ with MigraStem™ supports the Migration step. They are working complementary for the Release-Circulation-Migration concept developed by Stemtech.

Why was wheat grass added to Stemtech products?

Wheat grass is a natural component of wheat. The part of the plant used is young leave/stem. The ingredient is certified organic by the USDA. It is used as a natural coloring green agent. Wheat grass also serves as a natural source of nutrients such as iron, calcium, magnesium, amino acids, chlorophyll, and vitamins A, C and E.

What does R mean in se3-R?

It means Release, in reference with the first step of the Release-Circulate-Migrate concept.

A new formula with a new exclusive species of Aloes, Aloe macroclada added to the other ingredients of se3-R will be called se3. It will be available soon due to specific EU registration process. Aloe macroclada is endemic to Madagascar and traditionally considered by the local people as a natural healing ingredient. The extract is prepared from the gel of the leaves.

FOR YOUR INFORMATION

Vegan friendly 2 part capsule

Gluten-free with no added sugar, no artificial colour, no artificial flavour, no yeast or preservative.

Label statement

Consult your physician if you are pregnant or nursing. Many products carry such warnings out of an abundance of caution rather than any known pregnancy risk. We know of no evidence that consuming se3-R during pregnancy creates a health risk.
