

derma stem[®] Renewal Serum

1 fluid ounce (30 ml)

DermaStem Renewal Serum is a breakthrough serum that revitalizes the appearance of the skin, restoring and maintaining its youthful vibrance. DermaStem Renewal Serum's all-natural ingredients provide support for the skin's own natural process of renewal.

THE VERY BEST INGREDIENTS, EITHER CERTIFIED ORGANIC, OR WILD- HARVESTED, ARE BLENDED WITH INNOVATIVE PROCESSING TO PRESERVE THE DELICATE ESSENCE OF EACH ONE.

DermaStem Renewal Serum contains absolutely nothing artificial. It is an emulsion of dozens of ingredients gathered from around the world that work individually and in concert to support the skin's natural regeneration process, while also fighting the effects of oxidative stress and other harmful internal and external triggers that cause premature aging of the skin. Cold processing, preserve the very fabric of each plant for unprecedented effect.

Early clinical tests have demonstrated dramatic results (see graph).

Reduced Appearance of Fine Lines and Coarse Wrinkles

Increased Moisture Retention

Increased Elasticity

FEATURES	BENEFITS
Dozens of organic or wild-harvested plants with individual properties to fight the signs of premature aging have been assembled from around the world	A unique product that can return your skin to its youthful appearance.
Cyathia medularis (Black Mamaku), Aloe barbadensis (Aloe Vera) and berries are extracted using a cold infusion process so that the delicate essences of all the plants are preserved.	Each anti-aging ingredient is delivered in its most powerful, effective form for greatest benefit.
No mineral oils, preservatives, chemicals, solvents or alcohol.	The all-natural emulsion of natural oils disappears instantly into the skin for immediate effect and no residue, without potential toxicity.
Exclusive to DermaStem Renewal Serum : RejuvHyal™, a proprietary form of N-acetyl glucosamine which enhances the appearance of the skin, helping it to appear smoother and more youthful.	Younger looking skin feels tighter and smoother, and has a radiant glow.
Exclusive to DermaStem Renewal Serum: A blend of six Cytokines that support the natural action of the skin's adult stem cells.	Outer vibrance comes from renewal and rejuvenation of the surface of the skin, producing a more youthful appearance.

Place 1 to 2 pumps onto fingers, apply and smooth around face, starting with delicate areas. Use morning and night on a clean, slightly damp face.

One DermaStem Renewal Serum pump container will last 2 months, using 2 pumps of the product 2 times a day.

Refrigeration is suggested to preserve the delicate bioactive properties of this serum.

FAQ'S**What is DermaStem® Renewal Serum?**

DermaStem supports the skin's stem cells for natural revitalization. Its all-natural formula includes dozens of ingredients taken directly from the forests and jungles of the world, and combined in an emulsion of natural oils.

How is DermaStem Renewal Serum different from other creams and lotions marketed to fight the signs of premature aging of the skin?

DermaStem Renewal Serum is the only product on the market that supports the natural process of renewal, leading to a more youthful appearance. DermaStem Renewal Serum is processed using cold infusion that preserves the delicate essence of each plant.

How does DermaStem Renewal Serum work at the cellular level?

The elements in DermaStem Renewal Serum's formula provide the ideal environment for the regeneration of the skin. DermaStem Renewal Serum supports the skin's ability to retain moisture, leading to a visibly smoother skin surface. DermaStem Renewal Serum also contains strong antioxidants to help protect the skin.

What is the role of hyaluronic acid (HYA) in the skin, how is the loss of HYA in the skin linked to premature aging, and how is DermaStem Renewal Serum addressing the situation?

The matrix of the skin is made of a complex interaction of proteins and glycosaminoglycans (GAGs) of which hyaluronic acid (HYA) is one of the most important. In young skin, HYA is highly branched, but as we age, the skin's ability to synthesize branched HYA decreases. Highly branched HYA can absorb up to 1000 times its weight in water. The loss of branched HYA therefore leads to dryness, loss of skin integrity and wrinkle formation. DermaStem Renewal Serum contains RejuvHyal™, a proprietary form of N-acetylglucosamine, which helps improve the structure and appearance of the skin. DermaStem Renewal Serum also contains cytokines and other ingredients which further support the rejuvenation of the appearance of the skin.
